Men [unclear] - what's up  
No tell me what's up I

October 25, 1978

Dr. Walter B. LaBerge  
Office of the Under Secretary  
of the Army  
The Pentagon  
Washington, DC 20310

Dear Dr. LaBerge:

Just a quick note with an additional response to your question of what was needed to move forward. We just learned from Charles Carter at MIA/MIRADCOM in Huntsville that they have on Dr. Richard Haley's desk (DARCOM) their proposal to fund one of our highest priority research projects, investigation of psychokinetic effects on random noise generators (eventual application: a thought-controlled switch). From our standpoint this experiment offers perhaps the greatest scientific potential for getting at the mechanisms; therefore, it is at the top of our list as a research item. If this is in line with your wishes, perhaps a phone call from you to Haley could put this program into motion.

I hope this information is of some help.

With best regards,

H. E. Puthoff, Ph.D.  
Senior Research Engineer  
Radio Physics Laboratory
